## Food Transport - Thermoport

Issue 15

### When the going gets tough

### **THERMOPORT**

### **'SPECIALS'** get going!

### There is no ground too rough, or transport too tough, for the **Rieber Thermoport**.

Whatever your food transport requirements, BGL Rieber has the expertise and products to provide the right solution for you.

■ **THE 'Mega-K' SLIMLINE TRIPLE DECKER:** Looks like it is destined for a rock concert but actually it's a special order Thermoport for the safe transportation of large volumes of hot and cold food through narrow spaces. Designed to store as close as possible to each other to maximize transport space. Supplied with extra robust rear mounted welded steel handles.

■ **THE EXTRA-HEAVY DUTY QUAD-DECKER**  
Featuring extra-large castors to soak up the vibration from rough surfaces and pathways, these quad-deckers have a heavy-duty base, which provides extra stability and rigidity.

■ **TRIPLE DECKER FOR PLATED CHILLED MEAL DELIVERY**  
Three and two-tier Thermoport trolleys used to transport trayed chilled meals and foods. Trolleys are configured to suit different numbers at the service points, in this case, internally, but heavier duty castors can be used to cope with outside paths and roadways.

**■ TOWABLE THERMOPORT**

A 'Midi-K' mounted on heavy-duty bases and designed for towing by electric vehicle from a kitchen to a remote service point.

**■ HEAVY-DUTY CASTORS AND BASE**

fitted onto these two Thermoport Midi-K insulated boxes with integral heating, make it easy to move meals across uneven ground from the kitchen to any location.

**■ DRIVE-ABLE LOW ENERGY HOT THERMOPORT**

These orange Thermoports feature integral heating to maintain a steady 85degC. They use so little power, in fact, that they are being used in electric vehicles for delivering meals.

**■ THERMOPORT COMBINATION TROLLEY AND BOX SYSTEM**

A heavy-duty stainless steel heated Thermoport 2000U-HD for holding hot meals, with a detachable click system box for cold food, meaning both hot and cold meals can be delivered together.

**■ TROLLEY DOLLY**

Pulled by electric vehicle, a specially constructed 'dolly' transports four double Thermoports holding chilled food from a CPU.

**Don't forget, Rieber has a Thermoport box for every food transport eventuality... almost.**

For any food transport problem, BGL Rieber has the solution for contract caterers, schools, universities, armed forces, prisons, hospitals, care homes...
